

**MINUTES OF
CITY COMMISSION WORK SESSION
WEDNESDAY, MAY 19, 2010, 11:45 A.M.
CITY HALL, PIGEON FORGE, TENNESSEE**

Present were Vice Mayor McClure, Commissioner Brackins, Commissioner Robinson, Commissioner Wear, City Manager Teaster, City Recorder Clabo, City Attorney Gass, and interested parties. Mayor Whaley entered the work session during discussion on item 2.

Items discussed were as follows.

1. **Review and discussion of agreement for sewer connections** – Tony Glenn Rast was in attendance requesting permission to tie 120 sewer connections on Sequoia Road to the City’s sewer system. Public Works Director Miller stated that the property was in a hole and if the line was connected to Wears Valley Road a pump station would be required. However, if the Dry Fork Sewer line was installed, the connections should be able to connect to that line by gravity and eliminate the need for a lift station. City Attorney Gass recommended council to have consultants look at the request and get back to council with findings.

Following discussion, council directed staff to have SSR work with Mr. Rast’s engineer and report back with findings.

2. **Discussion regarding the Fiscal Year 2010-2011 budget** – There was general discussion regarding the budget including guidance to remove manhole rehabilitation work from the budget in the amount of \$12,500 until the contract could be reviewed and clear up some confusion.

Following discussion, council agreed to put on agenda for first reading June 14, 2010.

After general discussion, the meeting was duly adjourned at 1:05 p.m.
