

Tennessee Property Viewer

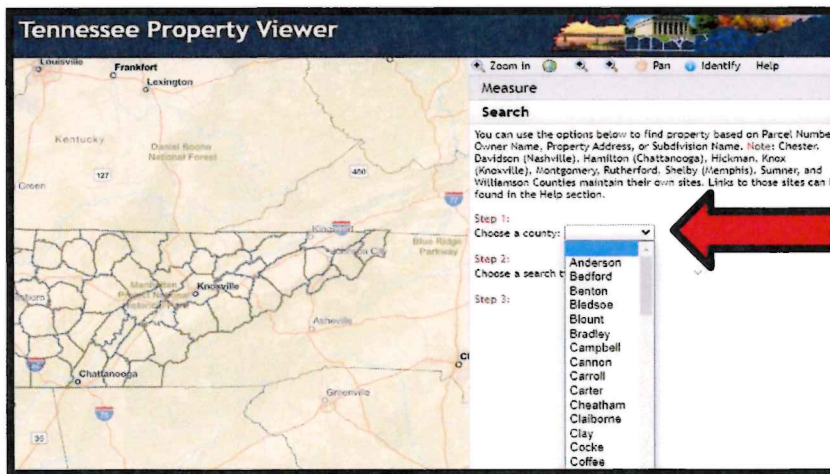

The State of Tennessee Strategic Technology Services (STS) - Geographic Information System (GIS) provides this website to allow for searching and displaying property ownership and location of flood hazard information. The website is available for 85 of Tennessee's 95 counties. If your county is not listed on this website, please visit your county's website to obtain your local property information.

Instructions:

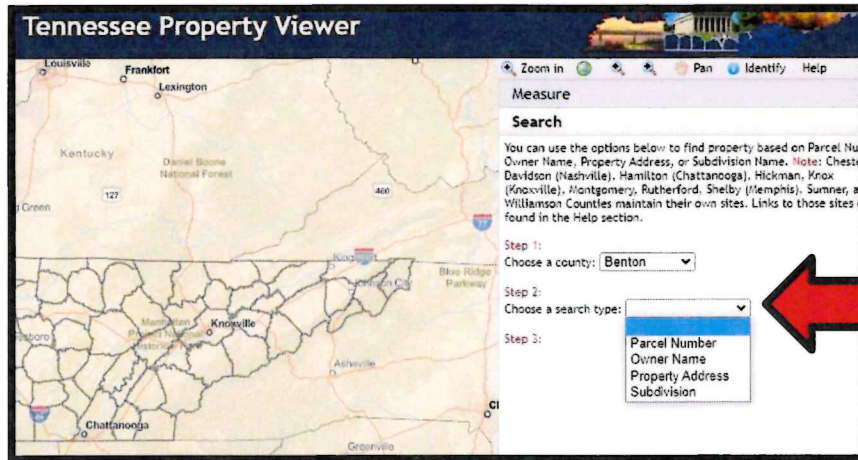

1. Go to the TN Property Viewer website: <https://tnmap.tn.gov/assessment/>. Your screen should look like the picture below.

2. Choose a county.

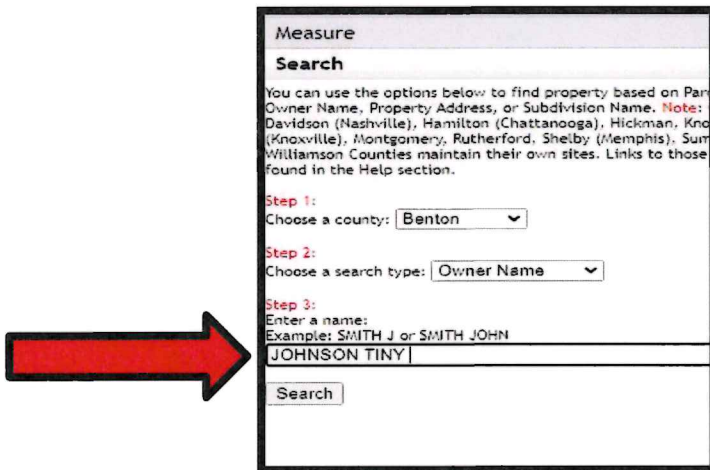

3. Choose a search type: Parcel Number, Owner Name, Property Address, or Subdivision.

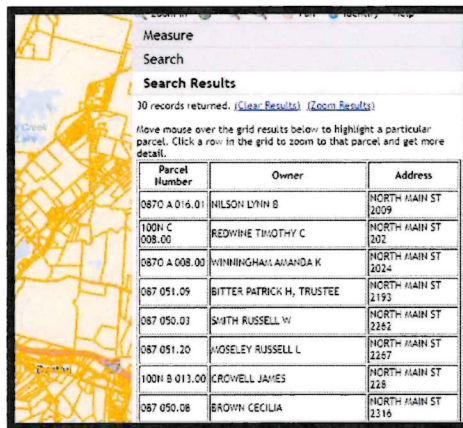

4. Further information will be needed based on the option chosen for number 3. Please follow these instructions:

1. Parcel Number: Here, the control map, group and parcel numbers are requested. However, they do not each have to be entered. One or two of them can be sufficient for finding a parcel. Once entered, select “Search.”
2. Owner Name: The owner’s name may also be used to find a property. As instructed by the website, enter their last name and then their first name. Once entered, select “Search.” An example is provided below:

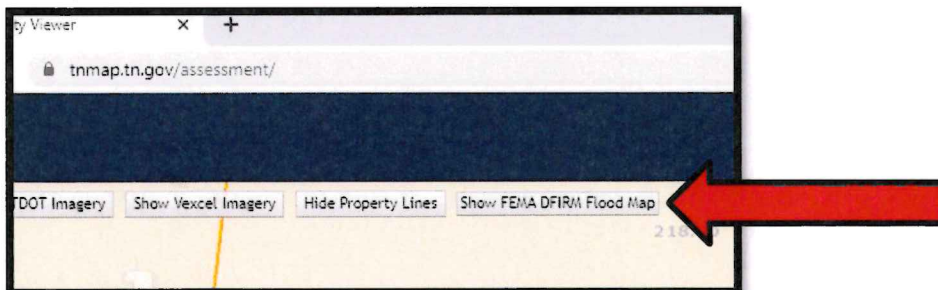

3. Property Address: For property addresses, the name of the street/road will need to be added first and then, the number. For example: NORTH MAIN ST 2. If you have not added the street/road name correctly, you will receive a screen stating that no results were found. However, if you have added the name correctly, you will be provided several options to choose from. Click on the option that best matches the property address entered. See the example below for “NORTH MAIN ST 2.”

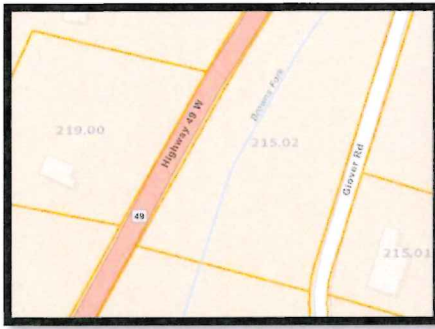

4. **Subdivision:** Here, you can search the name of the subdivision. For example, if searching for an address in Glover Hill subdivision in Robertson County, search “GLOVER” for results. Then, click on the option that best matches the subdivision entered. See the example below for results.

5. Once you have identified the correct location, click “Show FEMA DFIRM Flood Map.”

This will show if any special flood hazard area exists on the property which would be the blue shaded area. Compare the photos below for effects of the DFIRM Flood Map.

(No DFIRM showing)

(DFIRM showing)

6. In addition, you can click on the “TDOT Imagery” and “Show Vexcel Imagery” buttons to see the location of structures and access points.

(TDOT Imagery)

(Vexcel Imagery)

7. Obtaining Prints: To obtain a pdf copy of a specific address, click “Export PDF of this map.” Once clicked, you will have five minutes to click “Open PDF.” After opening the pdf, you can then save and/or print it.

Owner: 27
 Address: BURT'S CROSSING 3003
 Parcel Number: 101H A 068.00
 Deeded Acreage: 1.55
 Calculated Acreage: 0
 Subdivision: GLOVER HILLS SEC 2
 Subdivision Lot: 27
 Date of TDOT Imagery: 2017
 Date of Vexcel Imagery: 2021

The property maps represented on this website are compiled from information from the county Assessor's office and are a best visualization of how all the parcels fit together. The property lines are determined by examining detailed parcel maps and by using surveys created by a licensed surveyor but are not conclusive evidence of ownership in any court of law. If you feel your property is drawn in error on this website, please contact the Assessor's office and work with them to resolve the discrepancy.

Date of Vexcel Imagery: 2021
